

7 Reasons Why Imidan® is Perfect for Pecans

1. Excellent control of black pecan aphid, hickory shuckworm and pecan nut casebearer
2. Restricted entry interval of 3 days
3. Pre-harvest interval of only 14 days
4. Not a restricted use pesticide
5. May use 2 – 3 1/8 lbs. per acre
6. Easy on most beneficial insects and mites
7. Easy-to-use water soluble bags in one pound packets reduce mixer/loader exposure and minimize package disposal problems

Performance Advantages

- Does not flare mites or aphids
- Flexible broad spectrum pest control
- An excellent choice for your IPM program
