

Imidan® 70-W

Agricultural Insecticide

INFORMATION BULLETIN

NOW FOR USE ON CITRUS

Use on Citrus in CA approved under EPA SLN No. CA-060002

- Minimal disruption of beneficial insects
- Documented low toxicity to predatory mites
- Non restricted use/no permit required

Guidelines for Use

Rate	1-3lbs / acre*
PHI	7 days
REI	3 days
pH Range	For optimal activity and residual performance, acidify spray tank to pH of 4.0-5.5 before adding Imidan

- Do not make more than two applications per season
- Do not use in combination with oils
- Chemigation: Do not apply this product through any type of irrigation system
- Please follow the Section 3 label for further application directions

Imidan is highly toxic to bees exposed directly to treatment of residues on crops. Do not apply Imidan or allow it to drift into blooming crops or weeds if bees are visiting the treatment area. Protective information may be obtained from your cooperative Agricultural Extension Service.

* 3lbs may be used for large trees, high density plantings or applications using high volumes of water.
